# **JOB POSTING**

**Service:** Artificial Intelligence

**Job Type:** Permanent

**Primary Location:** Toronto, Ontario, Canada

**All Available Locations:** Calgary; Montreal; Toronto; Vancouver

#### Posting Description

**Are you a passionate software developer who wants to use artificial intelligence to solve real-world problems, a roll-up-your-sleeves team player who thrives in a daily collaborative environment, and a new technology adopter looking for experience in multiple fast-changing global industries?**

**Deloitte Omnia AI, Deloitte's Artificial Intelligence practice, is a team of specialized experts and cutting-edge information assets that facilitate successful artificial intelligence (AI) transformations. We develop AI-enabled solutions to address all aspects of a client's transformative journey with disciplined focus on business outcomes.**

#### Your role at Deloitte

- **Create various custom applications that tailor towards different clients by working with multiple teams and understanding business needs**
- **Implement large-scale software systems to generate insights and solve business problems using cloud-based platforms**
- **Design and develop front-end interfaces, backend systems with multiple programming languages and frameworks**
- **Consistently write effective code that is stable, secure, scalable and efficient**
- **Deploy data analytics automation and machine learning techniques to manage data, predict scenarios and prescribe actions**
- **Accurately define effort requirements and manage personal workflow to ensure the deliverables are created on time and in budget**

#### Posting Qualifications

- **B.S. or M.S. degree in Computer Science or a related technical field**
- **1+ years' experience building software solutions using JavaScript, PHP, Ruby, Python, C++ and/or Java / C#, etc.**
- **Experience developing web applications including experience with front end technologies ranging from HTML, CSS, React / Ember / Angular, and working knowledge of relational and non-relational databases and SQL**
- **A strong background in data structures, algorithms, and design patterns**
- **Linux system knowledge and scripting in a Linux environment**
- **Experience in defining, analyzing and documenting business requirements**

Mr. Ryan Brain  
Managing Partner, Deloitte  
8 Adelaide St W #200  
Toronto, ON, Canada M5H 0A9

Re: Job ID # **44561** – Software Developer.

Dear Mr. Ryan:

Please accept this letter and my resume as my application for the job position of Software Developer with your company. With a Diploma in Software Engineering Technology, Bachelor's Degree in Computer Application, and hands-on experience using .Net languages to create and implement software applications, the skills and knowledge that I've gained along with the diversity of my work experience as a Software Tester makes me an excellent candidate for this job position (Job ID # **44561** ).

My 4 months of work experience as a Software Tester at Mindfire Solutions, provided me with the opportunity to gain wide experience in testing applications and websites, filing application/software related issues. I consistently display a courteous and professional manner when working with the developers, and I handle the last-minute testing tasks very calmly and efficiently. My team lead often complimented me for reporting the functionality driven bugs, which other testers couldn't easily. I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.

Your company is widely known for giving its employees the opportunity to develop their skills and potential while working in a safe, secured and friendly environment. This motivates me to seek employment with your company, and I am confident that my unique skill-sets will be an asset to your organization. Please feel free to contact me at 289-242-3227, or by email at [schoud27@my.centennialcollege.ca](mailto:schoud27@my.centennialcollege.ca).

Sincerely

Sidharth Choudhary

# **Samples of Work**

# SWOT

## **Strengths**

- Logical thinking – to find logics for programming.
- Multi-tasker – can perform and manage Study, Work and Social life at same time.
- Respectful and try to help people wherever possible.
- Disciplined in life – have some fixed schedules to be followed, similar to work-outs, having meal on time, and so on.
- Focused on any task assigned and try completing it with full dedication,
- Adaptable to changing technology.
- Determined for the given tasks.
- Think creatively to find alternatives for a given situation.
- Passionate about getting job as a developer.
- Submitting tasks before deadline.

## **Weaknesses**

- Stage fear – less confident while speaking in a gathering.
- Feel shy talking to new people.
- Nervousness while presenting my work to seniors.
- Elaborating on my perspectives.
- Passing on responsibility to someone else.
- Concentration on multiple task at a time.
- Sometimes I go thoughtless while managing tasks on which I have some learning.
- Short-tempered sometimes, when things go wrong way.
- Trouble saying 'No' to anyone.
- I try staying quite when someone argues.

## **Opportunities**

- References can help getting a better job.
- Work experience in IT industry - as a Software Tester.
- Working part-time with studies, strengthens our capabilities.
- Friends can refer or help finding a job of our similar interests.
- Team-mates with whom we work and spend professional time.
- Innovative ideas, can lead to self-improvisation and better Job.

## **Threats**

- Unemployment in the IT industry is biggest threat for developers.
- Changing Technologies expect us to learn and adopt the new technology.
- Native citizens, as they get priority in the market.
- Being a Fresher in IT software development industry.
- Loneliness as we do not get any emotional support.
- No Canadian work experience (in same field).
