WORKSHOP ASSIGNMENT …..SELF INTRODUCTION-ELEVATOR PITCH

….. HAND-IN in with Career Portfolio…EMPS: (Rev: SS-2019)

YOUR NAME: Sidharth Choudhary

Section: 004   **Class Day & Time: Sunday,10:30 a.m. – 12:20 p.m.**   **TODAY's   DATE:** Jan 27th, 2019

YOUR INTERVIEW SELF-INTRODUCTION: (write in full sentences)

My name is Sidharth Choudhary and I'm currently enrolled as a full-time student for advanced Diploma in Software Engineering Technology Fast-track program. I completed my Bachelor's in Computer Application degree from Indraprastha University, Delhi, India in the year 2017. Moreover, I opted for additional courses of Android Development and C#.Net Development along with my Degree. During my education, I gained skills in programming languages C, C++, .NET, JAVA. And some front-end programing languages like JavaScript and NodeJS. Furthermore, I learned working with Cloud technologies: Amazon AWS, Microsoft Azure, mLab and Databases: MySQL, MS-Access, Oracle, MongoDB.

Being an IT employee, we are expected to acquire some interpersonal skills to work effectively and efficiently in a healthy environment; some of the skills that I owe are that I'm highly reliable and responsible as I prefer to complete and submit the task in given time, I have some strong Leadership skills and never hesitate to take charge. I like taking actions which are emotionally intelligent, that is, I try to understand other's emotional state and take actions accordingly. Not only this, I pursue Good Communication skills, I can communicate in various languages with the staff and clients.

Following to completion of my Bachelor's Degree, I was hired as a Trainee Software Tester at Mindfire Solutions, Noida, Delhi, India. I had a great experience working there, and learnt how to behave and tackle situations at work place. Completing my 4 months testing project, I decided to quit the job and pursue my further studies. Soon, I enrolled myself in Advanced diploma studies.

Furthermore, I would like to highlight some of the qualities that I gained throughout my life experiences. I learn things very quickly, whether it be new programming language or new technology. Adherence to timeliness is another key aspect that I follow in the working environment. I have an Eye for detail and try being organized at work, so that things don't get messed up. Also, I have the ability to work under pressure and can perform multiple tasks at a time, ensuring all the tasks get completed accurately.

I think I will be the best candidate for this job as I have what it needs to fulfil the requirement of a software developer – to develop a product with minimal bugs, using my knowledge of programming and my experience working as a software tester.

SAMPLE: PLEASE EXPAND ON THIS SECTION!

NOTE: ++++…MORE CONTENT SHOULD BE ADDED TO THIS SAMPLE…..++++

My name is Sidharth Choudhary

I am a graduate from Centennial College, with a diploma in Software Engineering Technology.

I am also certified in Android and DotNet Development.

-During my academic studies at college (Centennial College), I have developed key technical skills in the area of C#, DotNet and Java programming. My soft interpersonal skills include reliability, emotional intelligence and good communication skills.

-These skills have developed my ability to perform well with others (in teams), by understanding them and work together effectively and efficiently.

My key interpersonal skills are leadership and teamwork.

My related work-experience includes a year designated as a Software tester. My year of experience in the area of Software Programming will help me excel at this position and become a valued member of your team

The qualities I bring to your company and this job are a better place to work in teams and completing the tasks in given time and in shear completeness.

I'm confident that I'm the best candidate for this job because my work experience as a Software Tester along with my education and knowledge in Software Development can far outweigh the results of others.
